Microsoft Office 365 Support

What's Clouding Your Technology Plan? Do you Have a Plan?

Keeping your network running and secure, your systems updated, and your people prepared for the unexpected is the job of any good Managed Services Provider. Having the resources and healthcare know-how to guide an organization from on-prem to the cloud, provide interoperability and revenue cycle management advice, and to turn the need for a new telecommunications system from vision to reality, takes a special breed of MSP.

The road to the cloud is crowded with vendor claims that are often difficult to navigate.

A unified, practice-wide plan for public or hybrid cloud implementation must be flexible to scale with your organization, redundant for security reasons, and resilient to make future expansion easier.

Whether it's hardware or software, we'll help you make the right decisions, at the right time, in the most affordable fashion.

Office 365, Teams, and Sharepoint

When it comes to workflow, communication, and collaboration, the benefits of Microsoft's suite of products shines through in the maintenance and management of practice work environments (with particular focus on controlling digital sprawl while ensuring data security).

BaytechIT offers a variety of application design and implementation solutions to meet the needs of organizations large and small.

Microsoft 365 Business

► Cloud Analysis (deciding what workloads should and should not be moved the cloud)
► Complete Microsoft application design and deployment
► Customized staff training
► Ongoing maintenance

Our Promise

For us, it's all about being one of you. Everything we say and everything we do must be about becoming your IT partner. The only attitude we carry with us is gratitude. We never forget that the lifeblood of every healthcare organization is technology.

You've entrusted it to us. That's a responsibility we'll never take lightly.
